HUMMUS *a la Noah*

---

*A very smooth, creamy dip flavorful dip – perfect for pita chips, crudité, and sandwiches. This recipe is a crowd pleaser! Fun fact – my niece Lara – a hummus lover, will **only** eat at Noah's hummus*

Origin

Originated in the middle east, although the origin is controversial amongst many countries. "Hummus" comes from the Arabic word for chickpea. The full traditional name is called hummus bi tahini, which translates to "chickpeas with tahina".

- **Prep Time:** Estimated time 15 minute
- **Cook Time:** Estimated time 5 minute
- **Servings:** Number of servings, 6-8

Preparation – *Mis en place* – *Everything in its place*

Tasks to complete before the main cooking begins to ensure a smooth process.

- **Chop/Dice:** Peel garlic, squeeze 2 lemons
- **Assemble Tools:** Blender

Ingredients

- **Primary Plant Protein/Base:**
    - 2 cans chickpeas
- **Fresh Produce & Aromatics:**
    - 3-5 garlic cloves
    - 2 lemons – approximately 6-8 tsp lemon juice
- **Pantry Staples & Seasonings:**
    - 8 tbs of water from the chickpeas (called Aquafaba)
    - 4 tbs tahina (Israeli version is the best)
    - 2 tsp of salt
- **Garnishes/Toppings:** ○ pine nuts, zaatar seasoning

🔪 Directions

Clear, sequential steps to guide the cooking process.

- **Prepare**
  - Peel garlic
  - Drain the chickpeas – save the water from the can – this is called aquafaba.
  - Squeeze lemon

- **Blend**
  - Blend the garlic first
  - Add chickpeas, garlic, lemon, aquafaba, tahina and salt to the blender

- **Taste**
  - Add more tahina, lemon and salt as needed.

- **Finish & Serve:** Sprinkle with Zatar seasoning and can serve with pita chips and/or crudité

💡 Quick Tips

Bonus advice for variations, efficiency, and sustainability.

Flavor Boost: add cumin, pine nuts and salt as needed

Meal Prep Hack: can stay in refrigerator for many days.

Nutritional Information

- *Estimated values*

Chickpeas	One cooked cup approximately 269 calories, 14.5g of protein, 45g of carbs, 12.5g fiber, and 4.3g fat Nutrient-dense legumes packed with plant-based protein, complex carbohydrates, and dietary fiber.
Tahina	1 tbs approx. 89 cal, 3 g protein, 8 g fat, and 3 g of carbs A nutrient-dense paste made from ground sesame seeds that is high in healthy fats, protein, and essential minerals
Garlic	For a single garlic, 4.5 calories, 1 gram of carbohydrates, and 0.2 grams of protein. It is virtually fat-free and sodium-free.
Lemon	One medium raw lemon (approx. 58 grams, without peel) provides 17 calories, 0.6 grams of protein, and 5.4 grams of Raw lemons are a low-calorie, fat-free fruit packed with vitamin C, water, and fiber carbohydrates

What is aquafaba? Is it good for you?

- Aquafaba is the thick, starchy liquid leftover from canned chickpeas or other cooked legumes. It functions as a popular vegan substitute for egg whites and whole eggs because its unique mix of plant proteins and starches allows it to whip, bind, and emulsify
  Aquafaba is generally safe and healthy as a plant-based egg and oil alternative, but it is very low in nutrients, containing only trace amounts of protein and minerals, and may cause gas or bloating for sensitive stomachs

What is tahina and is it good for you?

- Tahina a smooth, creamy paste made from ground sesame seeds. It is a staple ingredient in Middle Eastern and Mediterranean cooking, best known as a core component of hummus and baba ghanoush.
- Yes, tahini is very healthy as it provides healthy unsaturated fats, plant-based protein, and essential minerals like copper and iron. Contains sesame and other plant compounds that help lower inflammation
